THROUGH THE GULLY LENS

THROUGH THE GULLY LENS

MOCK CAMPAIGN DECK

GULLY LABS X ELUNO

2026

PRESENTED BY :
Kshitij Bajpai

THE BRANDS

GULLY LABS

One of India’s most trusted sneaker voices, Gully Labs was founded in 2023 to bring the Desiness of Indian footwear to the limelight.
Since then, they have collaborated with legacy companies as well as new age designers, experimenting and delivering a voice that is truly unique to the Indian experience.

ELUNO

A design-first premium eyewear brand, Eluno is making waves in Bengaluru with its catchy design. Founded in 2025, Eluno has already opened three stores in Bengaluru and is becoming a big name in the IT hub of India.

WHY THESE TWO

GULLY LABS

Digital-heavy distribution with a single experience store in Delhi. Kicks available in other big cities but Bengaluru has almost no physical touchpoint.
Previous collaborations have been with fashion designers like Sagal Singh, and legacy brands like Royal Enfield, but eyewear collaboration hasn’t been done yet.

ELUNO

Early age startup, and has covered the Bengaluru territory properly, but no physical touchpoint beyond that.
No brand or designer collaborations yet, however a summer collection dropped recently.

EL PLAN

SPECIAL
COLLAB
DROP

NIFTY NEEL

Y2K RETRO-FUTURISM FROM HEAD TO TOE.

Gully Number 001 - Baaz Baadal Blue

Eluno Sloan Grey

PRODUCT PAIRING

Layered retro-running silhouette in cool grey mesh, off-white overlays and soft blue accents make Baadal Blue a pair of kicks that leave people bedazzled. Pair that with the transparent, smoky-grey acetate frame of the Eluno Sloan with a solid grey lens, the Y2K color palette really grounds itself and stands apart in a crowd.

BHEESHAN BLACK

STEP UP, SCAN THE ROOM, AND OWN IT.

Gully Number 004 - Koyar Black

Eluno Lorenzo Black

PRODUCT PAIRING

With the handcrafted leather slide of Gully Labs, when you pair these high-gloss square frames of Eluno, you’re set to rule the spot, be it a speakeasy, or a boardroom.

CONTENT STRATEGY

CAROUSELS

Side-by-side product-pairing reveals — swipe from sneaker to eyewear, styled as one look.

REELS

High-contrast macro loops (15-25s): hand-polished acetate against rich leather grain, cut to a beat drop.

STORIES

72-hour countdown stickers and cryptic location teases. No links, no codes — just the clock ticking down to the door.

STREET TEAM AND UGC

Regramming the queue itself — line energy and first-in-line reactions become the loop that keeps footfall high for all 72 hours.

COLLAB ACTIVATION

DAY 3

On day 3, cards can by drawn by the first 20 people in line, and the card drawn decides what perks they get while buying the limited collaboration. Discount upto 15% alongwith a coupon for future purchases from both brands.
Gates open and close for both in-store buyers and online buyers at the same time.

DAY 1 & 2

Eluno's polished Bengaluru storefront becomes a raw sneaker vault. In Delhi, a dedicated Eluno fixture inside the Gully Labs Experience Store hosts the same two pairings for the same 72 hours. Reciprocity, made physical.
Sales made on a first come first served basis. First 10 buyers from day 1 and 2 get free customizations on their kicks and/or glasses.
Online queues and purchases are not subject to such offers and discounts, since online drop is primarily to leverage on a non Delhi & Bengaluru buyer's FOMO.

FUTURE PLANS

Once the gates close by the end of day 3, collaboration products go to the archive, to be re-dropped according to hype.
This collab officially gets Gully Lab into Namma Bengaluru and into other diverse, creative floors.

RISK & MITIGATION

INVENTORY RISK

Two SKU pairs sold continuously across two sites over 72 hours raises stock-visibility risk between locations.
Mitigation: a hard per-site allocation split by expected footfall, with a manual restock-transfer protocol if one site sells through faster.

EXECUTION RISK

A 3-day takeover across two locations, plus online, doubles the moving parts.
Mitigation: both sites' staffing, security and layout locked in advance, with a shared on-site playbook rehearsed before gates open.

BRAND RISK

Two very different moods in one campaign could feel disjointed.
Mitigation: messaging pre-approved by both creative houses; each drop keeps its own distinct identity within the shared, reciprocal spaces.

COORDINATION RISK

Both sites need to stay in sync on stock and queue length without a live public dashboard.
Mitigation: a simple internal, staff-only stock-sync check every 15 minutes between locations and online store.

EXECUTION TIMELINE

PRODUCTION (WEEKS 4-6)

Shoot macro teaser videos and product photography for both pairings. Build the Instagram content calendar, Reels, and Story assets — awareness only.

ACTIVATION (WEEK 10)

72-hour continuous vault event across both sites — gates open Day 1, gates close Day 3. Live social coverage of the queue, no online drop.

FINALIZATION (WEEKS 1-3)

Confirm inventory across both drops and both sites, pricing, and lock in the Eluno storefront and Gully Labs Experience Store as reciprocal vault locations.

PRE LAUNCH AND LAUNCH (WEEKS 7-9)

Begin influencer seeding and the 3-week Instagram teaser arc. Finalize on-site queue infrastructure, wristbands, signage and staffing at both locations.
